To Whom It May Concern,

The Louis Berger Group, Inc. (Berger) is performing environmental studies for The Potomac Appalachian Transmission Highline project (PATH). These environmental studies focus on the identification of:

- Wetlands
- Cultural Resources
- Threatened and Endangered Species

This work is necessary to satisfy federal and state regulatory requirements.

**Employees of Berger are currently in the area performing some of these studies. If you encounter them and would like to verify their identity, you may ask to see their PATH photo id card.**

If you would like further information or have any concerns, please contact a representative of PATH at 1-888-290-0867 or visit the PATH website at [www.pathtransmission.com](http://www.pathtransmission.com) where you can learn more about the project and submit questions or concerns.

Sincerely,

A handwritten signature in black ink, appearing to read "Jay Ruberto".

Jay Ruberto  
Director, Transmission Siting
